

Scaffold Tower

Overview

This scaffold tower training course provides health & safety legal requirements and the knowledge to allow attendees to maximise the personal safety of their selves and co-workers.

Who should attend

Anyone whose duties include the need to assemble, use, inspect, alter and dismantle mobile access towers.

Course Aims & Objectives

As well as meeting health & safety requirements, the knowledge that the training gives you will allow you to maximise your personal safety and that of your co-workers. The course will include a practical session followed by a practical assessment, and then a theory test. Upon completion of these, successful candidates will then be awarded a certificate of training in the safe use and pre-use of scaffold towers.

Certification

"NPORS" National Plant Operators Registration Scheme, own certification and photo ID cards.
